431 602 [261] on a man's property, as did also, in the following order, his sister's son and his brother's son. Within the household, food was freely shared, and correspondingly, a co-resident could ask for a material object. These requests, however, were not always granted. A common excuse was to say that the object was promised to someone having a stronger claim. Despite these evasions, the patterns of gift-giving created a constant circulation of food and objects throughout the village.

Inheritance

424 428 533 [768] Transmission of property was accomplished chiefly through trade and gift. There is no information on the disposal of the material possessions of the deceased. The only available data on inheritance concern the office of chief and the possession of certain songs sung at the *ole* (manioc) ceremony. The former was inherited patrilineally and will be discussed later. The ceremonial songs were inherited either through the mother's brother or the mother's father. Thus, old Matiwana would some day teach his *ole* songs to Amanatain, his daughter's eldest son. Nitvary, another of the three men who knew *ole* songs, learned them from Jawaku's father, who was his mother's brother. Since cross-cousin marriage was practiced, [588] Jawaku might marry Nitvary's sister, and their child would inherit the songs from Nitvary. In this way the *ole* songs returned to the direct patrilineal line every other generation.

613 In response to careful questioning, Quain was assured that these songs could be obtained only from the mother's brother and mother's father, and not from the father or the father's brother. The combination of this matrilineal trait and patrilineal elements is characteristic of the bilaterality in upper Xingú culture.

The Trade Game

437 517 524 The trade game was a mechanism of inter- and intra-community distribution. Even more importantly it provided a framework for social participation, leisure time relaxation, and general enjoyment. As such it was one of the few integrating factors in Trumaí society.

Afternoons, especially rainy afternoons, were dull times in the Trumaí village. In Quain's words, "These people are bored but don't realize it! Wrestling provides some diversion, but nothing quickens spirits more than a brisk trade game (*kwirxo*). All that is needed is for one of the men to stride through the village with a bundle of goods to trade and suggest a *kwirxo*. Shouts go up on all sides, everybody crowds into one [574] of the houses, and the game is on. Enthusiasm is even greater when there are visitors in the village."

421 437 524 [156] [527] It was significant that Aloari, probably the most aggressive person in the village, was often an organizer and always a main participant in the games. On the other hand, he never cooperated in group work.

This conventionalized form of exchange, which Quain called the trade game, had a strong functional role in Trumaí culture, but there are indications that it was of outside origin. One informant said that it was [177] a Bakairí custom, and Quain thought that the "game" might have been introduced by Bakairí traders bringing goods from the Indian post on the Paranatinga River.[1]

The Household

171 516 622 Among both the Waurá and the Kamayurá the extended family occupied its own house, and the head of the lineage was considered a sub-chief of the village.[2] Such unilocal, co-resident and extended family groupings, which were typical among tribes of the upper Xingú, were absent in the Trumaí village.

592 613 Consanguineally close male relatives usually formed co-resident units, but these nuclei of kinsmen were very small and did not constitute an entire household. Furthermore, they were related to each other through [591] male or female lines. Due to village patrilocality, there was a tendency for patrilineally related males to live together, but this did not result in [165] the establishment of a patrilineal lineage for several reasons. Among them the high death rate was very important.

592 594 Maibu's house illustrates the eclectic nature of the Trumaí household. Four nuclear families, totaling fourteen people, lived in it. Hanging their hammocks from one of the two center posts were Katauka, his son Kamkuti, his brother's son Autsuki, and another brother's son and his wife. At the opposite end of the house were Maibu and his wife, the wife's son by Maibu's deceased brother, Maibu's sister Ayenuke, Makurawa, a classificatory sister's son, and Makurawa's wife and their three children. Although everyone in the household was related, bonds were closer between those people who hung their hammocks from the same post.

589 592 182 Despite the fact that the household, as a unit, had no specific functions, it established the framework within which certain interpersonal dependencies were worked out. Bride-capture, intertribal warfare, divorce, and early death caused a significant proportion of the Trumaí to be temporarily or permanently without mates. This disadvantage was

[1] The trade game was possibly borrowed from the Bakairí, as its existence among this group has been reported by Oberg (1953, p. 72). However, craft specialization and trade on the upper Xingú predates the Indian post. Cf. von den Steinen 1897, pp. 196, 207. [177]

[2] De Lima (1950, p. 9.) reports this arrangement among the Waurá, and Oberg (1953, p. 48.) adds that the position of house chief tends to pass in the male line in the Kamayurá village.
